

Herbilicious Lemonades

Uggghhh! It's so powdery and doesn't feel like lemonade. Something is missing!

Maybe the refreshing element or the zest of herbs and lemon is missing?

So why wait? Let's make it a unique blend of refreshing flavours.

The first sense of taste should be herbilicious.

Fresh basil, mint, and thyme work well no powdery mouthfeel!

Voila! This is what an actual glass of herbilicious lemonade tastes like.

Oh, and it also has digestive properties with jeera, ginger, amchur, and black salt.

High five, chefs! It's citrusy... flavoursome... in every sip!

Exactly. No residue, no shortcuts just clean, herby refreshment.

Now we have true herb flavour with no powdery texture
